

DUE DILIGENCE SERVICE

toXcel provides comprehensive technical support for all aspects of Due Diligence. Working with legal and accounting groups (either independent or collaborating contractors), we serve the following clients and issues: (Pharmaceutical, Biotechnology, Chemical, and Consumer Product Companies)

- Mergers and Acquisitions where a strict vulnerability analysis is required to determine liability under TSCA §8(e), FIFRA §6(a)(2) for US legislation; EU and other OECD member states.
- Analysis of regulatory vulnerability and assessment of emerging regulatory issues.
- Novel compound development when venture capital sponsors require additional funding and need a structured business plan to present to potential investors.
- Supporting legal and financial groups in technical matters to elucidate the critical issues in product development.
- Costing product development programmes to input into the investment requirements and identify the target end points for taking options and further financial positions.
- Providing expert third party technical support for review of confidential documents for acceptability to the relevant authorities for all aspects of safety evaluation.
- Access co-development strategies to optimise investment potential.
- Assess validity of Mode of Action data.

We have highly qualified regulatory toxicologists and other allied specialists who routinely evaluate data and compile study programmes and are fully aware of the parameters that investors consider to be critical to the decision-making process and expect to have addressed.

toXcel participates fully in this multidisciplinary process and has experienced partners for comprehensive execution of all critical components. **toXcel** can participate as a technical advisory partner with an existing client team or provide a full operational group.
